2. A site assessment evaluating the effect of the proposed facility on (i) ground and surface water resources, (ii) agricultural resources, (iii) parks, (iv) registered historic sites, and (v) forestland on the data center site or immediately contiguous land.
3. Details of any new or existing substations that will be used to serve the data center, (ii) the anticipated transmission voltage required to serve the data center, and (iii) the anticipated routes of any new transmission lines needed to serve the data center.
4. Details of the (i) anticipated water daily and annual usage required to serve the data center facility, (ii) type of cooling for the facility (ex. air cooling, closed loop water system, open loop water system, etc.), (iii) whether the facility will use potable or reclaimed water, (iv) anticipated daily and annual amount of wastewater, and (v) how the facility will purify wastewater.

(b) Setback and Screening Requirements

1. Data center structures and ancillary equipment shall be at least one thousand (1000) feet when adjoining property is zoned R-C, Conservation District, R-1, Low Density Residential District, R-2, Low-Medium Density Residential District, R-3, Medium Density Residential District, or R-4, High Density Residential District.
2. A vegetative evergreen buffer compliant with section 35.2-63.10 shall be provided around the perimeter of the property, unless adjoining property is zoned I-1, Restricted Industrial District, I-2, Light Industrial District, or I-3, Heavy Industrial District.
3. Ground mounted and roof top mechanical equipment shall be screened from public roadways and adjoining properties on all sides.
 - i) All generators shall be enclosed with an approved enclosure or located within the primary structure.
 - ii) For other Mechanical Equipment, an opaque screen shall be provided when visible from public roadways and adjoining properties on all sides. This screening may be provided by either the principal building, louvered wall, or equivalent screen approved by the City Planner. The maximum height of the opaque screen should correspond to the tallest piece of equipment being shielded from view.

(c) Generator testing and cycling shall be limited to weekdays (Monday to Friday) between the hours of 8:00 a.m. to 5:00 p.m. Notwithstanding the foregoing, all noise generated by a data center, including generators, shall comply with section 26-56.

(d) Noise and Noise Monitoring.

1. The applicant shall submit an Environmental Noise Impact Assessment prepared by a qualified full member of the Acoustical Society of America (ASA), a member of the Institute of Noise Control Engineering (INCE), or a member of the National Association of Acoustical Consultants (NCAC). The purpose of such noise impact assessment, modeled in SoundPLAN, CadnaA, or accepted equivalent, shall model anticipated noise levels as a result of facility operation and establish a baseline noise level prior to approval of a rezoning or conditional use permit.
2. A noise study certifying noise levels shall be conducted within 90 days after the issuance of the first Certificate of Occupancy (CO) and every 12 months thereafter. Each noise study shall be submitted for review to the Zoning Administrator and/or his/her designee to assess the actual impact of the completed project.
 - i) The measurement of sound or noise pursuant to this section shall be as follows:
 - (1) The measurement of sound or noise shall be made with a Type 1 or Type 2 sound level meter which meet the standards prescribed in ANSI S1.4:2014, "Specification for Sound Level Meters." The instruments shall be maintained in calibration and good working order. A minimum of three (3) sound level readings shall be taken. The average of these readings will be used as the average sound level. If the background noise is equal to the levels set forth in this section, three (3) dB shall be subtracted out of the average sound level.
 - (2) The slow meter response of the sound level meter shall be used to determine that the average amplitude has not exceeded the dBA readings or the limiting noise spectra set forth in this section.
 - (3) Unless otherwise specified, the measurement shall be taken at the property boundary on which such noise is generated.
 - ii) Any additions, alterations, or expansion of a facility or its equipment shall require a new noise impact assessment to be submitted and approved by the Zoning Administrator.
 - iii) If the post construction noise study exceeds the maximum noise level permitted, additional noise mitigation strategies, improvements, or operational changes shall be required to reduce the noise to the permitted level.
3. Any equipment necessary for cooling, ventilating, or otherwise operating the facility, including power generators or other power supply equipment on the Property, whether ground-mounted or roof-mounted, shall include the following noise mitigation elements:
 - i) Low noise emission fans.
